STATISTICAL REPORT

PREFACE

The Operations and Statistical Analysis Section of Management Services presents the eleventh consecutive Fiscal Year Statistical Report. The report contains select statistical data on the number of inmates who were received at, confined in, and released from the Texas Department of Corrections between September 1, 1986 and August 31, 1987.

The report is published to provide the agency with a continuing source of comparative inmate demographic data, to serve as a resource document for criminal justice research, and to provide information to the public.

Data sources within the agency include the Electronic Data Processing Division, Financial Operations, the Windham School System, and the Division of Continuing Education. Additional information was provided by the Texas Department of Public Safety.

TEXAS DEPARTMENT OF CORRECTIONS
1987 FISCAL YEAR
STATISTICAL REPORT

INTRODUCTION

The Fiscal Year Statistical Report is composed of five main sections: Summary, On-Hand, Receives, Releases, and Graphics. The information presented in the document is descriptive; therefore, the reader should avoid the inference of cause-effect relationships between variables.

SUMMARY

This section presents summary data on inmate population trends and cost-per-inmate-per-day for the past sixteen years. Inmate population figures by TDC prison unit and the rate of incarceration by major Texas Metropolitan Statistical Areas are presented for the current fiscal year.

Computations of the mean (numeric average) and the mode (most frequent) for the variables of age, intelligence quotient, educational achievement, and sentence length appear in the summary.

The numbers of inmates who were enrolled in the Windham School System and in vocational and academic programs during the current fiscal year are also presented.

ON-HAND

This section provides data on the number of inmates who were physically present in the on-hand or active inmate population on the last day of the fiscal year - August 31.

RECEIVES

This section provides data on the number of inmates who were received at the Texas Department of Corrections (TDC) during the fiscal year. The four primary categories of receives are New Receives, Parole Violators, Mandatory Supervision Violators, and Shock Probation Violators.

New Receives

These are the inmates who were actually received or admitted to TDC during the fiscal year with original new commitments. Excluded are paper transactions that involve no inmate movement such as additional convictions received subsequent to original commitments.

In previous Fiscal Year Statistical Reports, the New Receives appear in the Admission Section.

Violators of Supervision

These are the inmates who were received during the fiscal year subsequent to violating the conditions of release to the community on Parole, to Mandatory Supervision, and to Shock Probation.

When a violator returns with a new conviction for an offense committed subsequent to release to supervision in the community, the inmate's record is reviewed to determine the amount of time that must be served to satisfy the sentence or the previous conviction.

- If the amount of time left on the previous conviction exceeds the amount of time required to satisfy the sentence for the current conviction, the inmate receives no new TDC identification number and is counted in the appropriate Violator category. The previous conviction offense becomes the current Offense of Record.

- If the amount of time left on the previous conviction is less than the amount of time required to satisfy the sentence for the current conviction, the inmate receives a new TDC identification number and is counted in the New Receive category. The new conviction offense becomes the current Offense of Record.

- Total Receives

These are all of the inmates who were received during the fiscal year by the categories of New Receives, Parole Violators, Mandatory Supervision Violators, and Shock Probation Violators.

Excluded from the report are violators of conditional pardon. Because of the small number in this category of receives, statistical information on this group of inmates has never been presented in the Fiscal Year Statistical Report. During Fiscal year 1987 approximately 17 inmates were received as violators of conditional pardon.

RELEASES

This section provides data on the number of inmates who were released from TDC during the fiscal year. The four primary categories of releases are Discharge, Parole, Mandatory Supervision, and Shock Probation.

- **Discharge**

  These are the inmates who were physically released from TDC during the fiscal year. This includes inmates released both by expiration of sentence and by court order. Excluded are paperwork transactions that involve no inmate movement such as multiple sentences that are discharged individually.

- **Parole**

  These are the inmates who were released on parole during the fiscal year under conditions and provisions for supervision in the community as determined by the Board of Pardons and Paroles.

- **Shock Probation**

  These are certain nonviolent offenders who were released under the supervision of the Texas Adult Probation Commission. A candidate for release on shock probation serves between 60 and 180 days in TDC, and then his record is reviewed by the sentencing judge. If release is appropriate, the judge sets the conditions and provisions for probation.

- **Total Releases**

  These are all of the inmates who were released during the fiscal year by the categories of Discharge, Parole, Mandatory Supervision, and Shock Probation.

Excluded from the report are releases to conditional pardon. Because of the small number in this category of releases, statistical information on this group of inmates has never been presented in the Fiscal Year Statistical Report. During Fiscal Year 1987, one inmate was released by conditional pardon.

DESCRIPTIVE VARIABLES

The descriptive data in this report focus on fourteen specific inmate demographic variables:

1. The Number of Inmates by Month.
2. The Place of Conviction by Texas Metropolitan Statistical Area.
3. The Place of Residence by Texas Metropolitan Statistical Area.
4. The Prior Number of Confinement Periods in the Texas Department of Corrections (TDC).

5. The Prior Number of Confinement Periods in Adult Prisons Other than TDC.

6. The Segregative Classification of Inmates.

   This classification system combines the offender's age and prison confinement history.

   First offenders are inmates who are serving their first prison confinement.

   Recidivists are inmates who have at least one but no more than two prior periods of incarceration.

   Habituals are inmates who have at least three prior periods of incarceration and who are at least twenty-six years of age.

7. The Race of Inmates (Black, Hispanic, and White are the three principal racial groups presented.)

8. The Age of Inmates.

9. The Intelligence Quotient Score (IQ).

   The IQ's of inmates who entered TDC prior to October 1978 were derived from the Revised Beta Test. From October 28, 1978 through January 31, 1984 the Revised Beta II System was used. Since February 1, 1984, inmates who score 70 or less on the Revised Beta II are administered the Culture Fair IQ Test. Inmates who score 70 or less on the Culture Fair are administered the Wechsler Adult Intelligence Scale Text (Revised).

10. The Educational Achievement Score (EA).

    Generally, the EA score presents the approximate level of academic achievement in terms of the representative number of years of primary education. The EA score is derived from the Adult Basic Education Test. Scores above 10.0 were attained prior to 1973 when the Gray-Votaw-Rogers General Achievement Test was used.

11. The Offense of Record.

    These are the offenses of conviction that resulted in the longest terms of sentence. Thirty-three National Crime Information Center Uniform Offense Classifications ranging from Homicide to Civil Rights are presented.

12. The Length of Maximum Sentence.

    The maximum number of years imposed by the sentencing court for the Offense of Record are presented.

13. The Number of Prior Probated Sentences (New Variable).

14. The Current Time Earning Class (New Variable).

15. The Current Custody Classification (New Variable).

16. The Average Calendar Time Served.

    For inmates who were released from TDC, the average day-for-day term of confinement by sentence length is presented in a year-month-day format. For example, under the column heading "YR-MO-DY" 01-11-29 signifies a sentence that was served in one year, eleven months, and twenty-nine days.

17. The Average Time Credited.

    For inmates who were released from TDC, the average amount of time credit received in fulfilling the maximum sentence is presented in a year-month-day format. Time Credited is the calendar time served plus the amount of good conduct time awarded for good behavior. For example, under the column heading "YR-MO-DY" 01-11-29 signifies a sentence that received credit for one year, eleven months, and twenty-nine days.

NO DATA

"No data" is the term that represents information which is not available for that particular variable. There are a variety of reasons for data not being available. These include key punch error, information not being provided by the inmate, information missing from the records, etc.

In the Statistical Report there are four tables in each section which consistently report a high percent of no data and therefore should be used with great caution. These tables are (1) Place of Residence, (2) Segregative Classification, (3) Intelligence Quotient, and (4) Educational Achievement. In some of these tables the information is not available for over 50% of the inmates.

Inmates with death sentences provide a specific problem in that they are technically county prisoners rather than state prisoners. This results in limited information being entered into their computer records. This particularly affects the on-hand section in which inmates with death sentences are partially represented as "no data" in several tables.
